Description :

Prsentation de l'diteurThe aim of the Edwards-Hovey Method for cornet or trumpet is to develop a method in which the material is arranged logically from the standpoint of (a) Rhythmic development, (b) gradual extension of the range, and (c) development of finger dexterity. Melodies have been selected which adapt themselves easily to correct phrasing, and exercises, while in keeping with limited range and technical ability of the beginning pupil, have been made as melodious as possible, avoiding monotonous and constant repetition of rhythmic patterns.
